Public Works · 6400 NW Beaver Dr. · PO Box 410 · Johnston, IA 50131 · 515-278-0822

NO MOSQUITO SPRAYING

The City of Johnston actively sprays the entire city to help minimize the mosquito population during the months of May through September. Without control programs, the mosquito population would flourish and cause potential health and comfort problems. Mosquitoes are known carriers of encephalitis, malaria, yellow fever and dengue viruses. Controlling mosquitoes also limits the number of mosquito bites caused while we try to enjoy the outdoors.

Due to concerns about pesticide exposure, the city will maintain a list of residents who do not wish their property to be treated with pesticides. The following form must be submitted annually.

Date: _____

Property Address: _____

Property Owner: _____

Date of Request: _____

Complete and submit this form each year to the Johnston Public Works Department. Once received, the sprayer will be shut off approximately 200' from the property. This is the maximum distance that will be used due to those residents who want the benefit and protection of the service.

When weather conditions are favorable during the months of May through September, Wilson Brothers Pest Control will spray on Thursday nights, starting at 9:00 p.m.

To have your property added to the Do Not Spray List, return this form to:
